

power of intelligence

ArgusAddress - read and recognize

ArgusAddress is a new generation of OCR/ICR engine specially designed to read address information on letters, parcels and small bundles.

ArgusAddress combines identification and analysis of handwritten and printed information. It provides highest read rates, reducing post-processing and manual rework to a minimum.

Therefore, fewer people, less space, less equipment are required to perform the work.

ArgusAddress can be combined with other **Argus** Modules (*Barcode, Label*) to provide comprehensive data capturing solutions for object surfaces.

Addressdata			
Zip	43512	Place	Defiance OH
Street	Jefferson	Number	1119

Features:

- Neural Network OCR / ICR engine
- Elevation of barcodes from 0,2 inch (5 mm)
- Omni-directional (360°) recognition
- Automatic address block locator
- Belt speed of up to 600 ft/m (2,5m/s)
- Image processing from a 130 dpi greyscale

power of intelligence

■ ArgusAddress - read and recognize

Hardware requirements:

- ArgusAddress runs on standard personal computers
- System specifications depend upon performance requirements

Benefits:

- 5, 9 and 11 digit ZIP code lift
- Character recognition can be adapted to any language
- Unprecedented read rates even on damaged or dirty labels
- Low error rates
- Limited post-processing
- Ideal for no-reads and rejects
- Most efficient solution
- Low capital investment
- Fully scalable to suit requirements

Integration:

- Open software structure
- Standard interfaces
- Scalable
- Easy to integrate
