

power of intelligence

■ PLANET_IS - recognize and sort

PLANET_IS is a standardised product for postal service providers for the automatic recording, tracing and sorting of postal items.

This system ist a combination of the intelligent record line **PLANET_IL** and a flexibly structured sorting system.

Sorting ist adjustment to meet customers requirements.

For a small number of stations, we offer a simple solution using individual sorting modules. For a larger number of stations, we recommend the application of a sorter.

Benefits:

- Automatic recognition of address data of barcodes, determination of format and weight
- Online- and offline videocoding for unread or uncertain data
- Labels printed with a logo, barcode and carrier number
- Troughput up to 7.500 items/hour
- Simply to extend, easy to operate

power of intelligence

■ **PLANET_IS - recognize and sort**

With **PLANET_IS** you can fully automate the data capture and sortation process for maximum efficiency and minimum operating cost.

Unique commercial benefit:

- Highest read rates
- PLANET_IS processes grayscale images
- Small manual rework
